DETAILED ACTION

1. According to paper filed on Nov. 25, 2008, the applicants have canceled claims 3, 5, 6, 10 and 13 and furthermore, have amended claims 1 and 11.
2. Claims 1, 2, 4, 7-9, 11 and 12 are now pending in the application.

Response to Arguments

3. Applicant's arguments filed on Nov. 25, 2008 have been fully considered but they are not persuasive. In regard to enablement rejection, the examiner does not agree with the applicants arguments that one skilled in the art would know how to practice the claimed invention from the present disclosure. As stated clearly in the last office action, there is lot of unpredictability regarding outcome of the combination treatment as supported by applicants own arguments on page 5, last paragraph. The applicants have not provided any evidence either in the specification or by providing prior art references that combination of a vasculostatic compound and an alkylating agent would indeed produce a therapeutic effect in a tumor disease.

In regard to indefiniteness rejection, the examiner does not agree with the applicants arguments that tumor disease is defined in the specification and therefore, is definite when used in the claims.

In regard to prior art rejection, the examiner does not agree with the applicants

arguments that this references does not anticipate the instant claims. As stated clearly in the last office action, the combination of vasculostatic agent, PTK787 and an

alkylating agent for treating proliferative diseases disclosed in claims 9-11 and 14 by Wood does anticipate the instant claims.

In regard to obviousness rejection, the examiner does not agree with the applicants arguments that the skilled artisan would not have reasonable expectation that combination would either maintain the antitumor effect or produce a synergistic effect. Bold's reference clearly teaches combining phthalazine compound with chemotherapeutic agents for antitumor effect while Reidenberg's reference teaches efficacy of chemotherapeutic agent, temozolomide in various cancers. Therefore, it would have been obvious to one skilled in the art to treat tumors using this combination with reasonable expectation of success.

Conclusion

4. All rejections under 35 U.S.C. 112, first paragraph, 35 U.S.C. 112, second paragraph, 35 U.S.C. 102(a) and 35 U.S.C. 103(a) are maintained for the reasons of record.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
